PROFESSIONAL SUMMARY

Full-stack Developer with 2+ years of experience building and maintaining enterprise-level applications at a major energy company. Specialized in ASP.NET MVC, C#, and SQL Server, with proven ability to develop and maintain 30+ BPM applications across multiple business divisions. Experienced in implementing DevOps practices using Azure DevOps and SonarQube, and led proof-of-concept initiatives for AI-assisted development tools and infrastructure upgrades. Strong foundation in .NET framework, object-oriented programming, and relational database design.

PROFESSIONAL EXPERIENCE

Application Support Developer
Medco E&P Indonesia | Semarang, Indonesia | October 2025 – Present

- Provide IT support for BPM applications in Supply Chain Management (SCM) division, handling production tickets and user requests with 27-hour SLA compliance
- Perform emergency response and hotfix deployment for critical production incidents, coordinating with cross-functional teams to minimize business impact
- Conduct data impact analysis to ensure modification integrity across interconnected modules, maintaining data consistency in production environment
- Create comprehensive documentation for incidents (ITHP/ITSR) to build knowledge base and identify recurring issues for process improvement
- Implemented AI-assisted debugging workflows to streamline troubleshooting process and improve user guidance efficiency

Software Developer
Medco E&P Indonesia | Semarang, Indonesia | June 2024 – August 2025

- Developed and maintained 30+ Business Process Management (BPM) applications across multiple business divisions using ASP.NET MVC 4.8, C#, WCF services, SQL Server, and MySQL
- Resolved 200+ change requests and improvement tickets, enhancing application functionality and user experience
- Implemented DevOps practices using Azure DevOps for version control and CI/CD pipelines, and SonarQube for code quality analysis
- Led proof-of-concept (POC) for GitHub Copilot Enterprise adoption, evaluating AI-assisted development tools and transitioning to ChatGPT and Claude integration via CLI
- Spearheaded POC for developer laptop RAM upgrade initiative, successfully implementing 32GB RAM across all developer machines to improve development efficiency
- Conducted knowledge sharing sessions on GitHub Copilot usage and dashboard valve monitoring system for pipeline maintenance

Management Trainee
PT Kairos Utama Indonesia | Semarang, Indonesia | February – May 2024

- Developed 4 enterprise applications: Leads Management (sales pipeline), Asset Management (internal inventory), HRIS (recruitment workflow), and Proposal Scorer (AI-powered document evaluation)
- Built features including cascading dropdowns, CRUD operations, Excel import/export, Microsoft Identity authentication, and email notification systems using ASP.NET MVC 4.8, C#, jQuery, and SQL Server
- Integrated ChatGPT API for automated proposal scoring with criteria-based evaluation and reasoning output using Python and LlamaIndex

Backend Developer (Intern)
PT Golek Truk Dot Com | Semarang, Indonesia | February – July 2023

- Developed RESTful API endpoints for HR System application using Python and SQLAlchemy, enabling mobile app integration for employee management
- Built machine learning model for automated phone number detection in posters using YOLOv8, achieving sub-1-second processing time
- Designed and implemented PostgreSQL database schema for HR module, establishing table structures and relationships for efficient data retrieval

EDUCATION

Bachelor of Computer Science (S1)
Soegijapranata Catholic University | Semarang, Indonesia | 2020 – 2024

- GPA: 3.90/4.00
- Recipient of multiple scholarships: UKP Sandjojo Pandemi, SKS Sandjojo Peduli, UKP Sandjojo Peduli, and ADARO Scholarship
- Equipment & Logistics Coordinator, Students Association of Informatics Engineering (HMTI) 2021-2022

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, Go, SQL, Java, C++

Frameworks & Technologies: ASP.NET MVC, .NET Framework, WCF Services, RESTful API

Databases: SQL Server, MySQL, PostgreSQL

DevOps & Tools: Azure DevOps, Git, SonarQube, GitHub Copilot, CI/CD Pipelines

Other: Machine Learning (YOLOv8, SVM, Random Forest), UI/UX Design (Figma), IoT (Arduino)

KEY PROJECTS

Diabetes Prediction Analysis (Thesis) | *Python, Machine Learning*

- Conducted comparative analysis of SVM and Random Forest algorithms on US hospital diabetes patient data, evaluating accuracy and computation time across varying data scales

Phone Number Detection System | *Python, YOLOv8, Machine Learning*

- Developed automated poster rejection system that detects phone numbers in images under 1 second using YOLOv8, trained on manually curated dataset from social media platforms

Siega Auto Box UI/UX Design | *Figma (1st Place Winner - FICPACT CUP 2023)*

- Designed modern, intuitive Android app UI/UX for locker rental system featuring security features and loyalty program, winning 1st place at Faculty of Computer Science competition

ACHIEVEMENTS

- 1st Place Winner – UI/UX FICPACT CUP 2023 Competition, Faculty of Computer Science, Soegijapranata Catholic University
- Top 5 Student of The Year 2022 – Faculty of Computer Science, proposing innovative online sales system for university entrepreneurship center
- Chairman – Informatics Engineering Anniversary Event (200+ participants), September 2022
